

# Female Armor BINGO

You can play this game whenever you see a fictional warrior lady who's supposed to be a badass ready to get into battle... But something is not right about the outfit she's supposed to fight in... Cross out all the squares that describe something about her armor. Five crossed squares in line win!

*version 1.0*

Bikini/lingerie shaped	Random patches of skin uncovered	Thong	No head protection	Looks nothing like the male version of the same outfit
Sharp ornamental edges that can pierce skin	Cleavage	Looks like a bra, gives no breast support	High heels	No underwear
Boob window	Skin-tight metal	<b>Boobplate*</b>	Thigh-high boots	Nipples that poke through metal
Bared back	Covers only nipples & genitals	No pants	Bared belly	Cameltoe
Metal worn directly on bare skin	Almost naked for an adventure in cold climate	More metal used on boots/gauntlets than to cover vital organs	Underboob	More advanced armor = skimpier

\*breastplate with two boob-shaped bumps
